Application/Control Number: 09/816,627

Art Unit: 2643

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance: This invention relates to telecommunications systems, especially PBX/Server systems, also refered to as Multi-Line Telephone System (MLTS). Specifically, the invention relates to completing an emergency, e.g. 911, call from a station/device behind MLTS to a public network emergency facility and delivering precise location information of the caller based on a port equipment number associated with the port from which the emergency call originated.

The prior art of record in combination or alone fails to teach or suggest these elements of independent claims 4, 6, 11, 13, in combination with other elements. For example independent claim 4 has claim limitations such as storing a port equipment number for each device/trunk in the PBX/MLTS, and associating a callback number with each port equipment number. Similarly independent claim 6 has limitations such as storing a port equipment number for each device/trunk in the PBX/MLTS, and associating an emergency identification number (ELIN) and a call back number with each port equipment number. Independent claim 11 has limitations such as for storing a port equipment number for each device/trunk in the PBX/MLTS, and means for associating a call back number with each port equipment number. Independent claim 13 has limitations such as means for storing a port equipment number for each device/port in the PBX/MLTS, and means for associating an emergency location identification number (ELIN) and a callback number with each port equipment number.

Art Unit: 2643

For the above reasons, Independent claims 4, 6, 11, 13 and dependent claims 5, 7, 12, 14, 17-19 are allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Melur Ramakrishnaiah whose telephone number is (571)272-8098. The examiner can normally be reached on 9 Hr schedule.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Curt Kuntz can be reached on (571) 272-7499. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
